Experience

Mitratech Holdings Inc.
Role: Dev Support Engineer II
Guadalajara Jal, Mex
May 2024 - Present (1 year 9 months)

Job Summary:
- Provide L2/L3 production support for cloud-based applicant tracking and recruitment platforms.
- Troubleshoot full-stack issues across React front-end and Node.js backend services.
- Analyze application and system logs using Splunk to diagnose production incidents.
- Write complex SQL queries to investigate data discrepancies and optimize database performance.
- Monitor and maintain AWS infrastructure (EC2, RDS, S3) to ensure high availability.
- Support CI/CD pipelines using CircleCI and manage repositories via Bitbucket.
- Debug UI/UX issues using HTML, CSS, and JavaScript to improve candidate application workflows.
- Track incidents, manage sprint tasks, and document resolutions in Jira.
- Perform root cause analysis (RCA) and implement preventive fixes to reduce recurring defects.
- Collaborate with development and product teams to enhance platform reliability during peak hiring cycles.

Q2 Holdings Inc.
Role: App Support and Data Analyst
Guadalajara Jal, Mex
Oct 2022 – May 2024 (1 year 7 months)

Job Summary:
- Provide production support for financial applications, ensuring high availability and SLA compliance.
- Analyze transactional and financial datasets using advanced SQL queries, joins, CTEs, and stored procedures.
- Develop interactive dashboards and KPI reports in Power BI to support finance, risk, and operations teams.
- Perform root cause analysis (RCA) for data discrepancies, reconciliation breaks, and system performance issues.
- Utilize Python for data cleansing, automation, and exploratory data analysis.
- Support ETL processes and validate financial data integrity across multiple systems.
- Collaborate with business stakeholders to translate financial requirements into data-driven solutions.

TATA Consultacy Services Limited
Role: System Administrator
Queretaro Qro, Mex
Oct 2020 – Oct 2022 (2 years)

Job Summary:

- Administer and maintain Windows Server and Linux environments supporting stock trading and financial systems.
- Monitor server performance, availability, and capacity using Datadog to ensure minimal downtime.
- Troubleshoot hardware, OS, and application-level issues in high-availability trading environments.
- Manage user access, authentication, and security policies through Azure AD.
- Handle incident, change, and problem management processes using ServiceNow.
- Implement privileged access management (PAM) solutions using BeyondTrust to enhance security compliance.
- Perform system patching, upgrades, and vulnerability remediation in production environments.
- Optimize server performance through resource monitoring, log analysis, and tuning.
- Support disaster recovery (DR) and business continuity planning initiatives.
- Collaborate with network, security, and application teams to ensure system reliability during market hours.

Volunteer projects

COCONAT Workation Coworking
